

# Prepaid Calling Cards

**#1 International  
Wholesale Carrier**

**Global VoIP  
Network**

**High Quality  
Prepaid &  
Private Label Cards**

iBasis is a leading provider of wholesale international telecommunications services and a leading calling card provider in North America. We offer competitive rates and high quality service to almost any destination in the world. iBasis provides customized retail calling cards, with and without connection fees, enabling distributors to sell a wide variety of branded and private label cards for every target market. iBasis' customers leverage The iBasis Network™, the industry's most advanced VoIP network, which carried 3.5 billion minutes in 2003 ranking iBasis among the top 10 carriers of international traffic worldwide.

## **Retail Calling Cards**

Calling card distributors and carriers can take advantage of a full range of capabilities, from retail card design and production to international call completion, including reporting and customer care. Distributors can very quickly begin selling complete retail calling card products ready

for their retail accounts. iBasis calling cards are designed to meet the needs and requirements of various ethnic communities and distinct geographic locales in the US.

## **Private Label Calling Cards**

iBasis can design calling cards specifically for your company and your targeted markets. Overseas carriers can take advantage of private label calling cards as they look to market services to expatriates in the U.S. In combination with iBasis extensive network of

distributors, carriers can rapidly grow their traffic from the U.S. to their home country.

## **Outsourced Prepaid Platform**

Service providers who want to manage their own calling card rate decks can take advantage of the iBasis IP CallCard™ platform for billing, authentication, authorization and administration. Service providers using the iBasis IP CallCard service as their prepaid billing platform enjoy rapid service deployment while minimizing their risk

and upfront expenses. By outsourcing the billing solution to iBasis, service providers minimize their time to market while offering subscribers a proven calling card infrastructure. Service providers can grow their IP CallCard usage as their business grows. IP CallCard offers best-in-class, real-time, web-based authentication, authorization, and accounting (AAA), enabling flexible rate tables for sharper

target marketing. iBasis also provides a full set of tools for rate table administration and customer accounts management.

As your infrastructure provider, iBasis can also provide access to local DID numbers in many countries through our ConnectPoint® Global Access offering.

#### Competitive International Rates

More than 230 carriers and service providers rely on iBasis for exceptional coverage over a wide variety

of routes and the highest quality service at competitive prices. Two years in a row, service providers named iBasis the best international wholesale carrier in Atlantic-ACM's International Wholesale Carrier Report Card. The iBasis Network leverages the most advanced switchless architecture and iBasis patent-pending routing and traffic management technology to deliver high voice quality and call completion. iBasis' prepaid customers enjoy greater scalability, faster and cheaper feature development and true universal PIN and global roaming thanks to the iBasis softswitch architecture.

#### Global Access Numbers

iBasis ConnectPoint Global Access provides Direct Inward Dial (DID) numbers in Europe, North America and Asia. Calling card users dial lower-cost local or toll-free numbers to access the prepaid platform in different countries. iBasis has the proven experience to work internationally and to ensure high quality customer support.

By partnering with iBasis, you will immediately reap the benefits of a proven global VoIP infrastructure, offering competitive calling card services while ensuring top customer service.
